

USER MANUAL:

In the **appointments** section of the app you can discover if your appointment is on time or running late or find out more information about your provider. Navigate to the appointment page

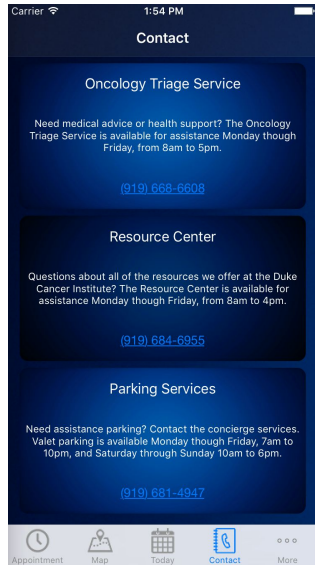

by clicking on the  symbol in the bottom menu bar. Once you have done this you can scroll through the list of providers, or merely start typing the name of your provider into the search bar. You may also filter providers by clinic by choosing the clinic from the top bar that appears when you begin typing in the menu bar (see below).

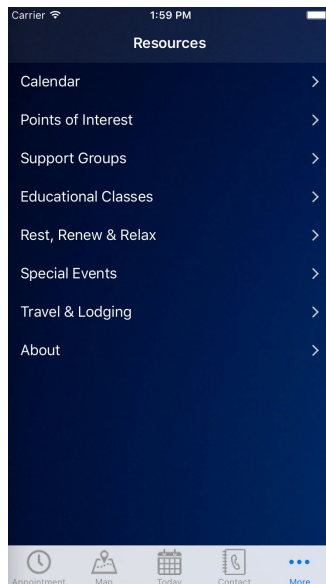

To find out if a provider is late or to read their bios, merely click on a provider's name.

The **contacts** section of the app provides quick and convenient contact numbers for the triage service, the resource center, and parking services. Click on the  icon to navigate to this page. To call one of the numbers, all you have to do is click on it.

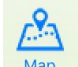

In the **More** section of the app  you will find additional resources including information about points of interest in the center, support groups, educational classes, relaxing activities, special events, and travel and lodging options. You will also find a link to the calendar (also accessible through the Today page) and an About page that gives you a bit more information about the development of this app. To navigate to any of these pages, just click on the text or the arrow next to it.

The **today** page  provides a list of events going on at the Cancer Center on that day. If you click on an image of the event, it will redirect you to the Calendar with an event description (see below).

The **map**  has a Google map view of the Cancer Center and the surrounding area. You can use two fingers on the screen to zoom in and out. Slide your finger around the screen to explore the surrounding areas. You can also rotate the orientation of the map by placing two fingers on the screen and rotating them simultaneously.
